

Mozzie Wipeout @ Cheng San

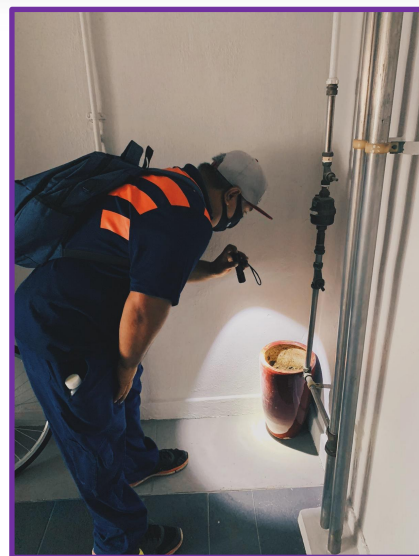

On top of our weekly programme to stem the breeding of mosquitoes in common areas, AMKTC also takes extra measures to wipe out mosquitoes at common areas in the blocks of dengue clusters.

On 21 August, AMKTC carried out a search and destroy Mozzie Wipeout Exercise at Cheng San Division – Blocks 438 to 445 Ang Mo Kio Ave 10.

Our officers carried out the following:

- Inspection of drains at the common areas
- Oiling the drains to kill potential mosquito larva
- Misting of common areas at the blocks
- Checking potted plants for stagnant water
- Checking for water ponding at the roof tops
- Going door to door to educate residents on dengue
