

Mozzie Wipeout @ Teck Ghee

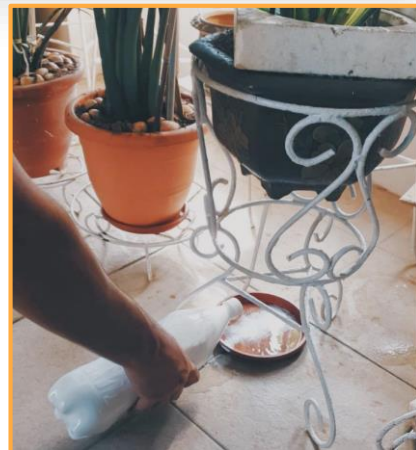

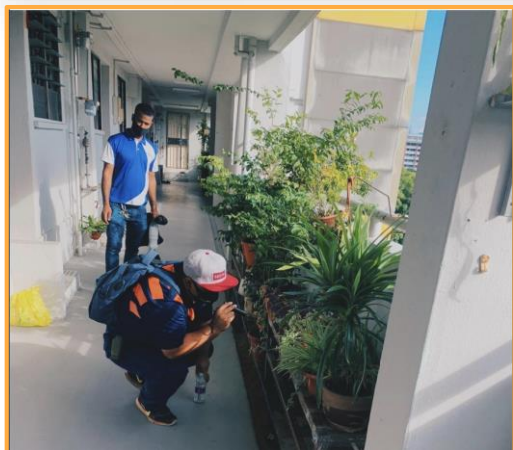

On top of our weekly programme to stem the breeding of mosquitoes in common areas, AMKTC also takes extra measures to wipe out mosquitoes at common areas in the blocks of dengue clusters.

On 7 August, AMKTC carried out a search and destroy Mozzie Wipeout Exercise at Teck Ghee Division – Blocks 301 to 302 Ang Mo Kio Ave 3, Blocks 303 to 306 Ang Mo Kio Ave 1 and Blocks 307B and 307C Ang Mo Kio Ave 1.

Our officers carried out the following:

- Inspection of drains at the common areas
- Oiling the drains to kill potential mosquito larva
- Misting of common areas at the blocks
- Checking potted plants for stagnant water
- Checking for water ponding at the roof tops
- Going door to door to educate residents on dengue
